

MODEL
520

A CLASS OF ITS OWN

STREET TOUGH MEETS STREET SMARTS

The Model 520 is built to withstand the harsh demands of the refuse industry. Powered by the lightweight PACCAR MX-11, the Model 520 delivers outstanding performance and reliability. New features include a redesigned gauge cluster with a 7-inch digital display that provides critical vehicle information and integrates with Advanced Driver Assistance Systems such as Bendix Fusion and side object detection.

The Model 520 incorporates many driver safety and comfort features including knurled exterior grab handles for a reliable grip, high-visibility bright yellow interior grab handles, LED headlamps and Electronic Stability Control (ESC). The updated VMUX electrical architecture and pre-configured frame layouts are optimized for seamless body integration. No matter the application, the Model 520 is designed to get the job done day in and day out.

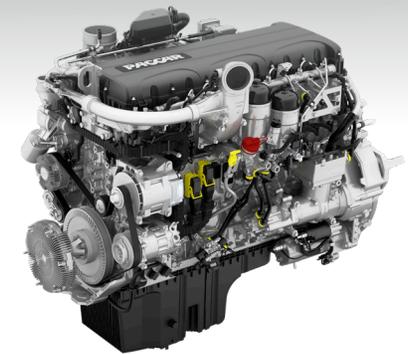

DRIVER COMFORT & PRODUCTIVITY

The 520 interior features a thoroughly updated ergonomic dash design with a new gauge cluster and a 7-inch digital display. The switches are optimally placed within easy reach for maximum driver comfort and productivity. The center console features angled side panels for easy access to controls from either side.

POWER & PERFORMANCE

A PACCAR MX-11 engine provides outstanding power in a lightweight package and is fully integrated with the truck's electrical system for the ultimate in PTO Body control customization.

PACCAR MX-11
