

1 A-PILLAR FAIRING

11 MIRRORS

2 NEW HOODS

10 CHASSIS FAIRINGS

7 WHEEL WELL
CLOSEOUTS

9 TANDEM AXLE FAIRINGS
AND WHEEL COVERS

3 LED HEADLIGHTS

8 GROUND SKIRTS

4 LED FOG/DRIVING/
DIRECTIONAL LIGHTS

5 BUMPERS

6 AIR DAM

THE NEW
MODEL
579

New Exterior Features

New Exterior Features

- 1 A-PILLAR FAIRING***
The new A-pillar fairing redirects airflow around the windshield for improved aerodynamics and noise reduction.
- 2 NEW HOODS**
The new hood is narrower with a lower crown height to improve forward visibility. The lightweight, impact-resistant Metton® material is extremely durable.
- 3 LED HEADLIGHTS**
New LED headlights increase safety with better nighttime visibility and better daytime conspicuity. Infrared heaters also help keep the lens clear in inclement weather.
- 4 LED FOG/DRIVING/DIRECTIONAL LIGHTS**
An industry first, the new three-function LED lights located in the bumper contains a fog light function for near field, a driving light designed to complement LED high beams and a cornering light that illuminates with the turn signal.
- 5 BUMPERS**
Multipiece bumpers are designed for damage isolation and low replacement cost, and are available in four finishes for customization.
- 6 AIR DAM***
A redesigned air dam improves aerodynamics while maintaining ground clearance.
- 7 WHEEL WELL CLOSEOUTS***
Now available with both low profile and 11R22.5 tires, these flexible components have mounting provisions built into the hood for improved durability and easy service.
- 8 GROUND SKIRTS***
Enhanced aerodynamic performance is achieved through optimized design and robust construction.
- 9 TANDEM AXLE FAIRINGS AND WHEEL COVERS****
These features work together to reduce drag around rear wheels for enhanced aerodynamic performance. The fairing is constructed from a robust material to withstand road debris.
- 10 CHASSIS FAIRINGS***
New tip-out chassis fairings allow easy access to chassis components and full removal without the need for tools to improve uptime.
- 11 MIRRORS**
Sculpted mirror heads and arms maximize aerodynamic efficiency and are now located on the cowl. Advance Aero mirrors with Digital Vision System are available.
